

ABOUT ME

I am a dedicated and motivated Computer Science student with a strong passion for technology and problem-solving. I approach challenges with efficiency, creativity, and a growth mindset. I am committed to continuous learning and delivering high-quality work in both team-based and independent settings. I strongly believe in transparency, fairness, and ethical collaboration

SKILLS

Programming Languages: Python, Java, HTML, CSS, JavaScript

Software and Technologies: ReactJS, MongoDB, NodeJS, Express, MySQL, PostgreSQL, GitHub, Salesforce, Arduino (Wokwi), Material UI (Basic), Bootstrap, Android Studio, Jupyter Notebook, AutoCAD (Basic), Weka (Basic)

Soft Skills: Communication, Time Management, Problem solving, Active Listening, Adaptability

Languages: English, Hindi, Oriya, Telugu

CERTIFICATIONS

- ▶ Salesforce Certified Agentforce Specialist
- ▶ Edunet – Internship on Artificial Intelligence and Cloud Technology
- ▶ Artificial Intelligence (IBM Skillsbuild)
- ▶ Introduction to Generative AI (AWS Skill Builder)
- ▶ Accenture Nordics – Software Engineering Job Simulation (Forage)
- ▶ Deloitte Australia – Data Analytics Job Simulation (Forage)
- ▶ Introduction to Python Programming (Coursera)
- ▶ Smart English Basics for Professionals (Great Learning)

HOBBIES

Exploring new technologies | Playing Chess | Listening to Music

EXPERIENCE

HCL TECH – ACADEMIC TRAINEE Apr 16, 2026 – Present | Bengaluru, India

Currently undergoing internship training at HCLTech with a focus on building expertise in enterprise technologies, software development practices, and corporate workflows within a professional learning environment.

PROJECTS

PROACTIVE MULTIMODAL ACADEMIC SUPPORT SYSTEM Apr 2026

Tech Stack: Flutter(Dart), Node.js, Supabase (PostgreSQL+pgvector), Generative AI (LLMs). Engineered an SOA-based platform with a native mobile client and AI middleware. Deployed a multi-key rotating load balancer for Gemini AI and pgvector for RAG-based retrieval, alongside real-time attendance dashboards with automated forecasting.

ML-BASED CROP ADVISOR Dec 2025

Tech Stack: Python, Streamlit, scikit-learn (Random Forest), Pandas, Matplotlib, Plotly

Built an ML-powered agriculture assistant using a Random Forest model to recommend crops based on soil and climate data. Integrated image-based plant disease detection and real-time data visualizations to help farmers make informed decisions.

AI-POWERED LEARNING MANAGEMENT SYSTEM Jan 2025

Tech Stack: Next.js 15, React 19, TypeScript, Clerk, Supabase, VAPI AI, Tailwind CSS

Developed a SaaS platform for personalized AI learning companions with real-time voice and customizable styles, featuring Clerk authentication/subscriptions, Supabase-based session tracking, user analytics, and live transcript display.

APEX VOICE ASSISTANT Dec 2024

Tech Stack: Java, JavaFX, Vosk (Offline Speech), JNA, Jsoup, Jackson, Maven

Developed a privacy-focused offline voice assistant using Vosk for secure system control and app management. Built a real-time JavaFX dashboard with system monitoring and integrated dual-mode recognition with web scraping for online queries.

EDUCATION

BACHELOR OF TECHNOLOGY (B. TECH) 2022 - 2026

- **Institute:** Malla Reddy University
- **Specialization:** Computer Science and Engineering
- **CGPA:** 9.32

HIGHER SECONDARY EDUCATION (12th Grade) 2020 - 2022

- **Institute:** Sri Chaitanya Junior College
- **Stream:** Science (Math, Physics, Chemistry)
- **CGPA:** 9.76

SECONDARY EDUCATION (10th Grade) 2020

- **Institute:** Scholars International School
- **Board:** CBSE
- **Percentage:** 90%
